816.605.5568 - Kansas City, MO, 64113

Education

Colorado College | Bachelor of Arts in Computer Science August 2016 - May 2020

- GPA: 3.55/4.0.
- Japanese Linguistics Minor.

Work Experience

Freelance Web Developer July 2020 - September 2020
[React, JavaScript, HTML, SCSS] *adventures-in-time.com*

- Designed and updated the client's website with a responsive design to showcase current books and author.
- Improved website load-times, speeding rendering up by around 60%.
- Reduced overall file sizes by about 90%, further improving SEO.

Software Developer November 2019 - March 2020
[React-Native, JavaScript, Python, Firebase] *Colorado College*

- Led a team of five a Full Stack React-Native app to boost student participation in college events.
- Built function to parse Colorado College's RSS feed to extract individual events and their respective information.
- Designed and built UI using React-Native components with customizable event cards for an intuitive and clean look.

Projects

Radiosity-Based Renderer October 2019
[Java]

- Created a customizable dot-matrix structure on 3D-planes for light calculations using arrays and linear calculations.
- Improved rendering speed by adding light path checking functions.

Block Calendar Application September 2019
[Java, CSS, MySQL]

- Led a team of three using agile methodologies such as user stories.
- Composed the user interface, and all functions that connect it to the database.
- Designed test cases for efficient release verification.
